

Using eHR Viewer to Identify Cancer Treatments provided by the Saskatchewan Cancer Agency

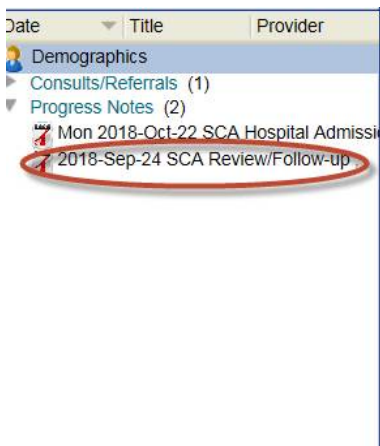

1. Log into eHR viewer per usual process.
2. Search for the patient per usual process.
3. From Patient summary, screen click on 'Clinical Documents'

4. On the left-hand side click on 'progress notes'

5. Under progress notes click on 'SCA Review/Follow-up', the note will appear on the right hand side of screen.

- 6. Physician notes can then be reviewed. Any current treatments should be listed as the final bullet of the 'Summary of Care'. Pharmacist would scroll through to the last bullet of the 'Summary of Care'. Alternatively the 'Plan' section at the end of the physician note generally also includes the current treatment. In this example, the patient is receiving bendamustine and rituximab (Rituxan®).
