ASSOCIATION  
OF SASKATCHEWAN

MEDIA STATEMENT ON PROVINCIAL HEALTH AUTHORITY REPORT  
January 5, 2017

SUBJECT: COMMENTARY ON PROVINCIAL HEALTH AUTHORITY REVIEW REPORT

The Pharmacy Association of Saskatchewan congratulates the Saskatchewan Advisory Panel on Health System Structure Report on arriving at recommendations that seek to make the provincial health care system more efficient and effective. Our 1,400 pharmacists support the need to harness existing services to increase accessibility and maintain the quality care provided by all health care professionals.

Pharmacists and pharmacies across the province are ready and willing to continue to contribute to patient-first care. This has been evidenced in the recent role pharmacists have undertaken in flu and other vaccinations, and in providing support to patients for their drug therapy and other health issues. PAS provided input to the panel through its written submission available at [www.skpharmacists.ca](http://www.skpharmacists.ca)

We look forward to working with the Government, the new Provincial Health Authority, and other health providers and stakeholders as we all move forward on this critical restructure.
