

Smoking Cessation

Pharmacist Prescribing of Minor Ailment and Patient Self-Care Conditions

This is a training course for minor ailment and patient self-care pharmacist prescribing for smoking cessation. This course will be offered in three format options.

Presenter: Terry Damm, BSP
medSask, College of Pharmacy and Nutrition

Learning Objectives

At the end of the course, the pharmacist will be able to:

- 1) Assess patient's medical history and current health to identify cautions and contraindications to prescription smoking cessation agents
- 2) Recognize red flags requiring referral for medical care
- 3) Compare and contrast available treatments, both OTC and prescription, with respect to efficacy, safety and indications for use.
- 4) Outline monitoring parameters for treatment plan
